Current Research in the Lab
- What are the physiological, emotional, and cognitive mechanisms through which the quality of parent-child relationships is transmitted across generations?

Research Assistant Opportunities
- Interviewing parents about their early relationships
- Collecting, coding, and analyzing physiological (EEG, heart rate) and observational data from parents and children

Now accepting RA applications
- Visit the lab website (see above) for an RA Application. Send your completed application to Dr. Ashley Groh (groha@missouri.edu).
